Production in action.

Why Avrasya Örme?

01

Direct production

Flexible circular knitting infrastructure and direct communication with the production team.

02

Flexible specifications

Composition, weight (GSM), width and structure are agreed for each order.

03

Controlled workflow

Order and batch information is followed through defined production control points.

04

Reliable planning

A monthly capacity of up to 150,000 kg supports disciplined lead-time planning.

LET'S DEVELOP YOUR NEXT FABRIC.

Share fabric type, composition, weight (GSM), width, colour, quantity and target delivery date.
